EDUCATION

University of Houston

Bachelor of Science in Computer Science, Minor in Mathematics, GPA: 3.65

Houston, TX

Aug. 2024 – May 2026

WORK EXPERIENCE

Software Engineering Intern

Energy AI Solutions

Houston, TX

Jan. 2026 – Present

- Built and maintained full-stack internal tooling (React, Flask, T-SQL) on Microsoft Azure within a **5-person** agile team to support data-driven job market workflows.
- Engineered automated web scraping pipelines for **Workday** job portals with configurable scheduling (hourly–monthly), pagination controls, and real-time status monitoring; scraped **100+** employers weekly.
- Developed a multi-tab job management dashboard with advanced filtering, paginated search, and employer-level reschedule scheduling, enabling teams to manage and delete **thousands** of listings and saving **2+** hours/week.

Founding Software Engineer

Righteous Bot

Remote

June 2019 – April 2025

- Designed, built, and monetized a production Discord bot with **650+** commands using Node.js and MongoDB; served **100,000+** users across **200+** servers.
- Integrated Spotify, Reddit, Twitter, and TikTok APIs to deliver real-time content and automation; partnered with online communities and record labels to ship custom moderation and engagement tools.
- Generated **\$8,000+** in revenue through paid features and custom integrations.

PROJECTS

CougarAI Website | *TypeScript, React.js, TailwindCSS, Flask, PostgreSQL, Stripe, JWT*

Feb. 2025 – Present

- Architected and deployed a full-stack club management web app with JWT authentication (rotating refresh tokens, email verification, Google OAuth), rate-limited REST APIs, and role-based access control for **200+** active members.
- Developed **12+** feature modules including QR code check-in with geolocation validation, live event attendance tracking, and Stripe Checkout with webhook-driven membership upgrades; automated event syncing and reminders via Google Calendar API and Flask-APScheduler, reducing manual overhead for members.
- Built a member dashboard centralizing points tracking, leaderboards, and check-in history, eliminating manual record-keeping and increasing member engagement by **60%**.

Volunteer Management Web App | *Flask, React/TypeScript, PostgreSQL, SQLAlchemy*

May 2025 – Aug. 2025

- Built a full-stack volunteer platform with JWT auth, email verification, and role-based access; implemented real-time reminders using Socket.IO and APScheduler in a team of **4**.
- Developed admin and volunteer dashboards with TailwindCSS; contributed to PostgreSQL schema design and event scheduling logic.

LEADERSHIP

Lead Software Engineer & President

CougarAI

Feb. 2025 – Present

Houston, TX

- Led technical architecture and full-stack development of CougarAI's production platform with a **team of 3** engineers; drove platform-wide security hardening including JWT token rotation, rate limiting, SQL injection prevention, and webhook signature verification.
- Directed a **6-person** executive board and **23-person** officer board across CougarAI's technical programs; organized a CS hackathon with **20+** teams and **100+** participants across **5** student organizations, and led ML workshops

TECHNICAL SKILLS

Languages: Python, JavaScript, TypeScript, SQL, C++, R, HTML, CSS

Frameworks & Libraries: React.js, Next.js, Node.js, Express.js, Discord.js, TailwindCSS, Vite, Socket.IO, Psycpg2, SQLAlchemy, Streamlit

Databases: PostgreSQL, MySQL, MongoDB, SQL Server

Tools: Git, Docker, VS Code, PyCharm, RStudio, Axios, JWT, REST APIs, Vercel, Heroku, Azure
