EDUCATION

University of Houston

Bachelor of Science in Computer Science, Minor in Mathematics, GPA: 3.6

Houston, TX

Aug. 2024 – May 2026

WORK EXPERIENCE

Software Engineering Intern

Energy AI Solutions

Houston, TX

Jan. 2026 – Present

- Built and maintained full-stack internal tooling (React, Flask, T-SQL) on Microsoft Azure within a **5-person** agile team to support data-driven job market workflows.
- Engineered automated web scraping pipelines for **Workday** job portals with configurable scheduling (hourly-monthly), pagination controls, and real-time status monitoring; scraped **100+** employers weekly.
- Developed a multi-tab job management dashboard with advanced filtering, paginated search, and employer-level reschedule scheduling, enabling teams to manage and delete **thousands** of listings and saving **2+** hours/week.

Founder & Software Engineer

Righteous Bot

Remote

June 2019 – April 2025

- Designed, built, and monetized a production Discord bot with **650+** commands using Node.js and MongoDB; served **100,000+** users across **200+** servers.
- Integrated Spotify, Reddit, Twitter, and TikTok APIs to deliver real-time content and automation; partnered with online communities and record labels to ship custom moderation and engagement tools.
- Generated **\$8,000+** in revenue through paid features and custom integrations.

PROJECTS

CougarAI Website | TypeScript, React.js, TailwindCSS, Flask, Google API, Psycopg2

Feb. 2024 – Present

- Revamped the club website with a modular React/Tailwind design to improve navigation, responsiveness, and maintainability for members.
- Integrated the Google Calendar API and synced officer-managed data through Flask RESTful APIs to automate event tracking and deadlines to save **2+** hours/week.

Volunteer Management Web App | Flask, React/TypeScript, PostgreSQL, SQLAlchemy

May 2025 – Aug. 2025

- Built a full-stack volunteer platform with JWT auth, email verification, and role-based access; implemented real-time reminders using Socket.IO and APScheduler in a team of **4**.
- Developed admin and volunteer dashboards with TailwindCSS; contributed to PostgreSQL schema design and event scheduling logic.

Coog Zoo | MySQL, SQL, React.js, Tailwind, JWT, Express.js

Aug. 2024 – Dec. 2024

- Developed a multi-role zoo management app with secure authentication and dynamic workflows for animals, staff, and events using SQL triggers and real-time dashboards for sales, donations, and event reporting.

LEADERSHIP

President (Previous Software Engineer)

CougarAI

Feb. 2025 – Present

Houston, TX

- Led a **team of 4** software engineers to rebuild the organization's full-stack website and bot, improving code structure, UI clarity, and maintainability for **200+** active members.
- Architected a points management system and integrated the Stripe API for payments, increasing member engagement by **60%** while overseeing planning, task delegation, and cross-stack execution (Flask/SQL + React/Tailwind).

TECHNICAL SKILLS

Languages: Python, JavaScript, TypeScript, SQL, C++, R, HTML, CSS

Frameworks & Libraries: React.js, Next.js, Node.js, Express.js, Discord.js, TailwindCSS, Vite, Socket.IO, Psycopg2, SQLAlchemy

Databases: PostgreSQL, MySQL, MongoDB, SQL Server

Tools: Git, Docker, VS Code, PyCharm, RStudio, Axios, JWT, REST APIs, Vercel, Heroku, Azure
