EDUCATION

University of Houston

Bachelor of Science in Computer Science, Minor in Mathematics, GPA: 3.6

Houston, TX

Aug. 2024 – May 2026

Houston Community College

Associate of Science in Computer Science

Katy, TX

Aug. 2022 – May 2024

WORK EXPERIENCE

Software Engineering Intern

Energy AI Solutions

Houston, TX

Jan. 2026 – Present

- Developed and maintained internal web applications using Flask, JavaScript, and React to support data-driven workflows, collaborating closely with engineers and following technical direction from management.
- Designed and operated web scraping pipelines to collect, normalize, and continuously update job posting data from multiple external sources for downstream analysis and internal tooling.

Founder & Software Engineer

Righteous Bot

Remote

June 2019 – April 2025

- Designed, built, and monetized a production Discord bot with 650+ commands using Node.js, MongoDB, and third-party APIs.
- Integrated Spotify, Reddit, Twitter, and TikTok APIs to deliver real-time content and automation for thousands of active users.
- Collaborated with online communities and record labels to develop custom automation tools for moderation, branding, and engagement, generating \$8,000+ in revenue.

PROJECTS

CougarAI Website | *React.js, TailwindCSS, Flask, Google Calendar API, Pycopp2*

Feb. 2024 – Present

- Revamped the club website with a modular React/Tailwind design and integrated Google Calendar API for dynamic event tracking and deadlines for club members.
- Collaborated with officers to sync backend data via Flask and RESTful APIs.

Volunteer Management Web App | *Flask, React/TypeScript, PostgreSQL, SQLAlchemy*

May 2025 – Aug. 2025

- Built a full-stack volunteer platform with JWT auth, email verification, and role-based access; implementing real time reminders using Socket.IO and APScheduler in a team of 4
- Designed admin/volunteer dashboards with TailwindCSS and contributed to PostgreSQL schema and event scheduling logic

Coog Zoo | *MySQL, SQL, React.js, Tailwind, JWT, Express.js*

Aug. 2024 – Dec. 2024

- Developed a multi-role zoo management app with secure auth, dynamic entry for animals, staff, and events triggered by automatic SQL triggers
- Created real time dashboards for sales, donations, event reports, using React and SQL visualization

LEADERSHIP

Vice President (Previous Software Engineer)

CougarAI

Feb. 2025 – Present

Houston, TX

- Led the redesign of the organization's full-stack website and bot, enhancing UX & automating points management
- Built dynamic, responsive features using Flask, SQL, Google Calendar API, and React through collaborative planning

TECHNICAL SKILLS

Languages: Python, JavaScript, TypeScript, SQL, C++, R, HTML, CSS

Frameworks: Node.js, Express.js, React.js, MongoDB, Vite, Discord.js, Next.js, TailwindCSS, Shadcn, Pycopp2, SQLAlchemy

Databases: PostgreSQL, MySQL, MongoDB

Developer Tools: Git, VS Code, PyCharm, R-Studio, JWT, REST APIs, Socket.IO, Axios, Docker
